SKIN-REPAIR

SKIN–REPAIR is a revolutionary skin care system new to the world.

How is it different from conventional products?

Conventional cosmetic products provide active agents or chemicals which force the skin to accept them. It is a fatal mistake! They treat the skin as though it were a non-living sheet of plastic, ignoring it's own built-in intelligence. They may improve the "look" of your skin temporarily, but they inevitably results in contributing to the deterioration of the skin and the loss of ability for the skin to repair.

Skin Moisture Retention

Source: 1991 European Standard Test for Skin Humidity

SKIN-REPAIR Does NOT Contain...

Extrim products do not have many of the ingredients found in conventional "care" cosmetics. Extrim comes with...

- NO chemical or natural active agents
- NO conservation ingredients, colors or perfumes
- NO undesirable side effects
- NO high-gloss, super-expensive and nearly meaningless image advertising
- NO animal testing (or raw-material tests)
- NO overpriced packaging Can be used for any skin-type. Slowly but surely equalizes dry as well as oily skin back to normal. Stimulates the skin to liberate itself in time from small scars, age spots pimples and early wrinkles.

Phi-Lambda-Technology®...

...produces extremely active and highly specific biotransmitters. **SKIN–REPAIR** is a developed system to work with inherent "memory or intelligence of your skin". **SKIN–REPAIR** is programmed with a moisturizing and rejuvenating information picked up by the skin. Since your skin is a living and intelligent entity, it can recover natural ability to rejuvenate and beautify itself without any chemicals or active agents commonly found in conventional skin care products. It is not necessary for you to understand the technology to benefit from it. Your skin will understand the information.

SKIN-REPAIR works with Phi-Lambda-Technology®. At first glance, it has nothing more than purified water: alcohol and glycerin, yet it can changes your skin.

Is it better to use more?

NO. The benefit of our product is not in quantity but the information it conveys. It is best to use a small amount every day.

What kind of results can I expect?

First and foremost, **SKIN–REPAIR** aims at overall improvement of the skin: helping it re-vitalize, smoother, tighter, and more youthful-looking skin. Some reports disappearance of scars, age spots, pimples and smoothing-out of previous wrinkles.

Years of Experimentation and Testing

While the exact nature of how Phi-Lambda
Technology works to convey intellectual information
to your body must be kept secret, the process was
developed after years of experimentation and testing.
The result is a perfected method that makes it
possible to practically imbue every desired piece of
information (even complete information packages
such as behavioral regulations, situation analysis,
etc.) onto such carriers as, for example, water.

Thus, within the **SKIN–REPAIR** preparation information is contained and transmitted to the body's own intellect through which 'dead" substances (resulting from chemical cleaning, radiated or similarly degenerated foodstuffs) are converted back into "living" tissue. This enables the skin to recognize the modern poisons in food, air, water and conventional cosmetics, and to expel these substances before they cause further damage. Further, it enables the body to counter the illogic of past trauma and actually create counter-actions with the highest efficiency.

LEARN THE TRUTH

The Secret Of Healthier, Younger-looking And More Beautiful Skin!

Why use a skin care system with no active agents?

Your skin is living and intelligent. It is very possible to retain beautiful, youthful-looking skin using your own inner power.

Most women believe that it's normal for their skin to begin showing signs of aging after just their 20th birthday – or even earlier! They're convinced by powerful marketing campaigns that it is necessary to use special chemical agents and products to keep their skin healthy, smooth looking and vital.

Nothing could be further from the truth. And just because this belief has been so widely disseminated and propagandized does not make it any more true. The fact is all skin is capable of using its own innate intelligence to remain smooth and beautiful for decades. The skin is prevented from doing this, however, when several harmful circumstances coincide. Among these are: insufficiently balanced nutrition; traces of poison in the water, air and food; and radiation damage from excessive sun.

Faced with such unnatural hardships it is difficult for the skin to produce the elements it normally uses to retain a beautiful smooth, youthful appearance. Furthermore, attempting to introduce these elements or agents from the outside using man-made cremes and products is the worst thing you can do for your skin, and only hinders the natural rejuvenating process.

The Fallacy of Man-Made Chemical and "Natural" Skin-Care Products

Conventional skin-care products do not take into account your skin's innate intelligence and vitality. They merely provide damaging chemicals – without asking your skin what it really needs to remain beautiful and youthful.

There are two primary ways in which conventional cosmetic products attempt to "force" your skin to be beautiful.

First, normal skin crèmes, lotions, masks, etc. are all designed to provide the skin with certain active "agents," which the skin is deemed unable to provide itself. Because the skin cannot assimilate these agents easily, special additives are often included which attempt to force the skin to accept them.

A second common approach is to ply the skin with "care-giving" cosmetics. These products attempt to force the skin to produce its own beauty-enhancing agents by introducing chemical designed to induce beauty-enhancing bio-chemical reactions. The skin reacts to these outside influences, however, by using its resources to defend against the intruding substances, thereby weakening its innate ability to revitalize and beautify itself.

Both these methods make the same fatal mistake. They treat the skin as though it were a non-living sheet of plastic, ignoring its own built-in intelligence and vitality. This deprives the skin of its ability to make decisions about what is best for its health and beauty. While skin-care products that utilize chemicals or natural agents may serve to temporarily improve the "look" of your skin, they inevitably result in contributing to the deterioration of the skin and the loss of its ability to repair and rejuvenate itself.

As an aside: the use of decorative cosmetics, serving to cover certain blemishes or enhance skin color, etc., are usually harmless and do not interfere with the skin's natural rejuvenating process.

Sensible Skin-Care: Using The Skin's Own Rejuvenating Power

Your skin knows what it has to do to stay young and beautiful, and even to repair damage. Sensible skin care supports the skin and its ability to stay young and beautiful and even recuperate from damage. All your skin asks is that you live a life that includes a healthy balanced diet, adequate sleep, neither too much nor too little sunshine – and nothing but a little mild soap or oil for cleansing. Greases and salves purporting to aid your skin do in fact the opposite – they contribute to the aging process and make it harder for your skin to remain smooth and beautiful.

Action-Free Extrim Products With Phi-Lambda Technology

Your skin can recover its natural ability to rejuvenate and beautify itself – through the use of action-free Extrim Products with Phi Lambda Technology. Phi Lambda Technology refers to the spiritual properties that are responsible for the body's mental intelligence, or the psyche of the biological organism, which effectively controls the organism. This is further known as "Lambda-Life quantum."

The Psyche of the Skin

Like any living, intelligent thing, your skin has its own psyche, or soul. And as it is with all living tissue, the soul life of your skin does not always proceed according to strictly logical reasoning. There are always two sides to the skin's story: those damages caused by factually objective occurrences as well as those caused by subjective, sometimes seemingly illogical, reactions in the thoughts and feelings of the skin psyche.

One example of this is overexposure to sunshine. Much of the skin damage that is in fact caused to the skin by relatively low doses of the sun's radiation is actually due to the fact that the skin "remembers" earlier incidents of harmful exposure and therefore over-reacts. This prevents the full functioning of the skin's bio-chemicals, leading to unnecessary sunburn. Thus, the skin not only uses extra energy, it actually damages itself and the normal healing process is curtailed. Taking this reasoning to its extreme, it is theoretically possible to suffer "sunburn" without ever actually being exposed to excess radiation. This is because the skin's psychic memory goes all the way back through the evolutionary process to the "original sunburn happening," which may even have come about as a result of the first one-celled tissue being washed ashore and dried by the sun near the beginning of evolutionary time!

Besides sunshine, other elements such as traces of poison or minute particles in the food we eat can also pose problems for the skin. But just as some people choose to remain healthy and happy in spite of difficult economic or environmental circumstances (while others resign themselves to despair and misfortune, often falling sick or aging rapidly), it is exactly the same with the skin. While one person retains youthful, vibrant looking skin throughout life, another becomes wrinkled and ages prematurely. The difference between these individuals lies in the psyche and its reaction to material circumstances – this is the same for the skin as it is with people.

Furthermore, even the molecules and material substance from which your skin is constructed has a form of its own psyche. This "memory of the matter" plays a meaningful role as one of a host of factors by which your skin may be revitalized and beautified.

Extrim Works With Your Body's Innate Intelligence

Extrim-Care Cosmetics work with Phi-Lambda Technology®, along with your body's own intelligence, in order to mutually bring forth your own natural, healthy beauty. Phi-Lambda Technology® relies on the "memory" of the skin, and the ability of every substance to carry its own information – just as a recording device can carry music or voices, the skin's own carrier substances are imbued with intellectual information. The water, alcohol and glycerin particles become carriers of information which is turned over to the body's own cells, where they are in turn distributed to all cells and intercepted by the body's own intellect. (The name Phi-Lambda Technology compares to this function – communication is carried via micro-matter "Phi" to the body's intellect ("Lambda").

Homeopathic and related "soft" health-inducing preparations function in a similar manner. In addition, many age-old herbal remedies achieve their results in a similar way. However, the Phi-Lambda Technology® distinguishes itself in two particular ways.

Beyond Homeopathy...

In the case of homeopathic remedies, the intellectual information originates in the history of the particle substances. As a result the "memory of the matter" is not precisely controlled, but rather empirically recognized and catalogued for each substance. With Phi-Lambda Technology®, however, the information is precisely formulated and imbued into the neutralized carrier matter – similar to the way music is recorded on tape. This assures a higher degree of efficiency and prevents negative information from being carried along.

Phi-Lambda Technology® Cannot Be Harmful!

Phi-Lambda Technology® always directs itself to the highest, most conscious instance of the body's intelligence and is presented as an information offer open to the body's intellect to choose or refuse. This voluntary action means that in practice the Phi-Lambda Technology cannot be harmful to your body.

Questions & Answers

Does a person's skin type require a different type of skin care with Extrim products?

No. With bio-energetic care skin type does not make a difference. Skin type is only considered a factor only when determining which ingredients should be provided to the skin in order to achieve the best results. As the correct answer to this question is "none," the type of skin involved does not matter. With **SKIN-REPAIR** r the skin becomes capable of returning to its optimal condition, regardless of how it has deviated from this condition over time.

Is it better to use more of the Extrim Skin-Repair liquid than is recommended?

No. The benefit of **SKIN-REPAIR** is not in the quantity used, but in the information it conveys! To convey this information, only a small amount of the **SKIN-REPAIR** liquid is required on each spot of skin surface. It is best, however, to use **SKIN-REPAIR** every day.

If you would like to benefit further from the Phi-Lambda Technology, we recommend that in addition to applying SKIN-REPAIR liquid daily you take Vita-Drops for the furthering of the intellectual transmission to improve overall body functioning. Metab-Drops for the intellectual support of the change of the substance, Symbioses-Drops for the immune system and Symbioses-Drops for the symbiosis in the digestive tract and for the skin. Other care products are available for the skin from the shoulders to the feet, as well as for hair, nails and the skin around the eyes, and to battle cellulite and stretch marks. We recommend you study the entire catalog or call us. We will be happy to advise you about all the care products available for your health and well being.

What Kind Of Results Can I expect With Extrim Skin-Repair?

First and foremost, **SKIN–REPAIR** aims at overall improvement of the skin, helping it revitalize and become smoother, tighter and more youthful-looking. Our customers have also reported the disappearance of scars, age spots, pimples and other irregularities, as well as the disappearance and even smoothing-out of previous wrinkles.

What do orthodox scientists say about Extrim Skin-Repair?

In 1991 the European Standard Test For Skin Humidity-Improvement was given to **SKIN-REPAIR** at the Institute of Skin Physiology in Holzminden, Germany.

The result was sensational: No previous product on the market had ever scored more than an 18% improvement of the skin's humidity factor. **SKIN–REPAIR** achieved an increase of 25.75%! And that result was achieved in a test that provided extremely disadvantageous conditions for the optimum slow build-up of bioenergetic care, as it was based on quick day-to-day results.

What SKIN-REPAIR Comes With...

SKIN–REPAIR has several things conventional "care" cosmetics do not have.

SKIN-REPAIR comes with...

- Phi-Lambda Technology and otherwise only distilled water, denatured alcohol and glycerin.
- Free telephone consultation before and after purchase by a competent authority
- Full right-of-return with right-to-refund if unsatisfied with the first-time purchase
- Unlimited storage warranty for the retention of 100% of functional ability

SKIN-REPAIR Observations

Steps To More Beautiful Skin

- Skin Self-Examination Before you begin your personal skin-care test with SKIN-REPAIR, take a few moments to carefully examine your skin in a mirror. Take a mental picture of your skin, capture the essence of how you look and feel in your mind's eye. (See the chart on next paget, and fill-in the appropriate boxes.)
- No Cremes or Lotions During the test period, do not use any other cosmetic skin-care product – no day or night cremes, no lotions, facial waters or masks – nothing that claims to help your skin by using either man-made chemical or natural ingredients.
- 3. Clean With Mild Soap Clean the skin of your face, throat and upper breast thoroughly on a daily basis, using only warm water and a simple mild soap that does not claim to have any "healing" ingredients. For eye make-up removal, use only a natural product such as warm vegetable oil (sunflower, corn, thistle or wheat germ). Afterwards rinse with warm water. Use no other chemical or natural cleaning fluids no mineral oil, no cosmetic "deep cleansers," no "healing soaps," or washing creams. (As far as possible, try to avoid getting shampoo or shower gel on your face while showering.)
- 4. Apply SKIN-REPAIR R Daily After your shower or facial wash, dab your skin with a small amount of water so it remains moist. Dribble three or four drops from your test bottle into the palm of your hand and wipe carefully over your entire face, neck and upper breast area. When applying SKIN-REPAIR to your dry skin (not wet from washing or showering), always moistens the skin first with a wet towel.
 - Explanation: The moist water film on your skin helps distribute the drops of **SKIN-REPAIR** consistently over your skin. (All that is needed is a minute amount of the **SKIN-REPAIR** liquid to be distributed over the surface of the skin.)

For problem areas such as scars, pimples or rashes, make certain that you dab these areas thoroughly with by wetting the tip of your finger and rubbing directly on the affected area.

- Air-Dry Your Skin After applying SKIN–REPAIR, let your skin air dry naturally – do not use a towel.
- When To Apply Make-Up If you use colorful makeup, the best time to apply it is immediately after you have dabbed your skin with the SKIN-REPAIR liquid.
- 7. Re-Examine Your Skin When your test bottle is empty (usually 8-15 days), take some time to carefully re-examine your skin, as in step 1. Pay attention both to how your skin looks and how you feel in your skin as well as how you feel about yourself in general. Now compare this new feeling with how you felt at the beginning of the test. (Fill in the appropriate boxes on the chart.)
- 8. Many people notice that SKIN-REPAIR has been able to help improve the look and feel of their skin in just the first few days of the test! In order to continue the process of improving, beautifying and revitalizing your skin we encourage you to order your first bottle of SKIN-REPAIR liquid. A single 50 ml bottle will last you over 20 weeks if used as directed. Use the simple order form attached to this test, or just pick up the telephone and call the number on the back of this pamphlet.

SKIN REPAIR

Observations

Condition	Before	After			
	NOTES	WORSE	SAME	BETTER	MUCH BETTER
All around feeling about how you look					
Wrinkles, crowfeet					
Smoothness of skin					
Clarity of skin-cleanliness					
Pimples, blemishes					
Tight or loose skin					
Rough skin, skin complex					
Old looking, young looking
